Project Summary:

Project Name: EControl – Application Development and Maintenance (Citigroup)
Language used: JavaScript with jQuery
Development Tools: SharePoint Designer 2013
Scope of Work: Issue fixing
Team Size: 3
Duration: From November 2019 to February 2020
Project Description: The EControl application contains multiple sites which are developed to track the scheduled activities every month. EControl Portal is created to manage all the activities of user. It provides a centralized location for all the documents. All the approvals are handled by the SharePoint workflows.
Role and Contribution:
- Developed custom web pages to provide the desired UI using HTML, CSS, JavaScript and jQuery
- Work related to issue fixing

Project Name: Data Quality Metrics Dashboard (Citigroup)
Language used: JavaScript with React
Development Tools: VS code, sqldeveloper
Scope of Work: Development
Team Size: 7
Duration: From May 2020 to January 2021
Project Description: An online recruitment platform was developed using react for front-end and Java Spring Security, Oracle SQL Developer for back-end. The application consists of two spaces – one for admin where he/she can upload new objective/subjective question answers and evaluate subjective answers and the other for the user where he/she can take exam with fixed time for each question. The user's performance will be evaluated automatically for objective part and displayed in the scorecard page.

Role and Contribution:

- Developed login page consisting of authorization and authentication using Formik
- Worked with the questionnaire input page consisting of multiple subpages, for admin to send the essential data
- Involved with the development of score card display and evaluation of subjective part of the application using redux for state management
