TECHNICAL SKILLS

Backend: Node.js, Express.js, RESTful API Design, Middleware

Frontend: React.js, TypeScript, JavaScript, Redux, Zustand, HTML5, CSS3, Tailwind CSS, Preact, Jest, Cypress

Databases: MySQL, PostgreSQL, Oracle (SQL)

Architecture & Practices: Microservices, Modular Architecture, Micro-Frontend Architecture

PROFESSIONAL EXPERIENCE

Senior Associate | *PricewaterhouseCoopers (PwC)*

Sep 2025 - Present

Client: Eli Lilly and Company

Bengaluru

- Led the development of a global healthcare web application for HCP-driven patient data entry, spanning UI architecture and supporting backend services.
- Designed and implemented a scalable internationalization (i18n) architecture enabling phased multi-language and multi-region rollout.
- Implemented country-specific application customizations, including UI behavior, validation rules, and backend integrations to meet localization and regulatory requirements across 25+ countries.
- Established and drove a repository-wide refactor across frontend and shared layers, standardizing coding conventions, and improving maintainability and scalability.
- Resolved critical issues across login, sign-up, registration, and email-based OTP authentication flows, ensuring secure validation, error handling, and consistent frontend-backend integration.
- Built reusable UI components to support regional customization with minimal duplication.
- Enhanced the analytics dashboard used by 250+ prescribers to track 550+ patient submissions, improving clarity of key information.

Technical Lead | *Nokia*

Apr 2022 - Aug 2025

Product: Network Services Platform (NSP)

Bengaluru

- Led the frontend development of enterprise-scale microservices within the Network Services Platform across multiple release cycles.
- Revamped GUI architecture to make applications more modular, maintainable, and performant.
- Built reusable, theme-aware React components that streamlined development and kept the interface consistent.
- Worked on a Node.js-based YANG-to-Form Generator using Express.js to dynamically create schema-based JSON structures for telecom applications.
- Integrated YANG-based schemas with form components for accurate data binding, validation, and real-time updates between UI and backend.
- Partnered with backend, QA, and UX teams to deliver cohesive feature enhancements aligned with enterprise release goals.
- Delivered meaningful GUI improvements that enhanced usability and client satisfaction across large-scale deployments.
- Troubleshoot and resolved UI issues in production, maintaining high system stability and uptime.
- Boosted unit-test coverage from 40% to 70% with Jest and Enzyme, strengthening reliability and reducing regressions.
- Integrated Cypress tests, reaching 90% coverage and improving release confidence.
- Implemented token-based, theme-aware styling for consistent experiences across light and dark modes.

Software Engineer | *Larsen and Toubro InfoTech (LTI)*

Aug 2019 - Mar 2022

Client: Citigroup

Mumbai

- Developed responsive and accessible React applications, including secure login workflows using Formik and Yup for validation.
- Integrated Redux for scalable and maintainable state management across application modules.
- Designed and implemented secure RESTful APIs for authentication and authorization.
- Applied JUnit for unit testing, achieving 90% code coverage and improving system reliability.

ACHIEVEMENTS

- Completed Meta Front-End Developer Professional Certificate on Coursera
- Achieved Microsoft Azure Fundamentals (AZ-900) certification
- Conducted a week-long React, Redux, and Cypress workshop for engineers

EDUCATION

Bachelor of Engineering (Civil Engineering) | 8.22

Aug 2015 - Jul 2019

Bangalore Institute of Technology, VTU

Bengaluru
